

## **Paris' #CivicTech Night**

**In the context of the Open Government Partnership Global Summit that France welcomes from December 7th to December 9th, the City of Paris organizes the first #CivicTech Night. On December 8th, from 7:00 pm, all over Paris, democratic and social innovation hubs have decided to open their doors to welcome you and make you feel, for one night, the pulse of a more inclusive democracy.**

The City of Paris wishes to open the Summit to citizens and organizes on December 8th with the collaborative platform Kawaa, **The #CivicTech Night**: a night of debates to invite Parisians to reinvent democracy. All night long, Parisians will have the opportunity to meet and speak with personalities committed for open governance and place citizens at the heart of public action.

Participation, transparency, the fight against corruption, open data, public accountability, modernization of public services, all are key components for revitalizing democracy that have been reinvented by many public and private players. In hosting the OGP Summit, Paris highlights and shares these values. All over Paris, democratic and social innovation hubs have decided to open their doors to welcome you and make you feel, for one night, the pulse of a more inclusive democracy.
